The present issue of "Asterisque" contains the texts of the lectures and talks delivered at the meeting on "Analytic Solutions of Partial Differential Equations" held in Trento (Italy) from 2. to 7. March 1981, as one of the activities of the "Centro Interuniversitario per la Ricerca Matematica" of the University of Trento. Invited lecturers were professors Akira Kaneko, Pierre Schapira and David S. Tartakoff.

The organization of this meeting began with the assistance of Aldo Andreotti whose recent important contribution to the problems taken as subject of the meeting are well known. His sudden death on February 21., 1980 left the Organizing Committee without the contribution of his ideas and the help of his experience.

The Organizing Committee and all the participants intend to dedicate to Aldo Andreotti the works of this meeting.
